Graphics

Video and board games

ABOUT ME

I have a Master's degree in finance and recently acquired an Engineer's in IT.

My professional fields of interest are widely connected to IT, mainly front-end development, software testing, SEO, cybersecurity, UX and e-commerce. I would like to expand my knowledge, especially in these areas.

I have an analytical mind, but also a creative one. I know HTML, CSS and basics of JS. I design websites in Figma and I'm familiar with Adobe suite, mainly Photoshop, where I work with graphics. Due to pandemic I prefer remote work.

I kindly invite you to visit my website:
